Highlighted fields

Field	Value
Source event	AZzmqroxQhUeWhvnQOpl
host.name	kali
agent.status	Offline

Endpoint.policy.applied.artifacts.global.channel	default
user.name	kali
rule.name	Linux Suspicious Child Process Execution via Interactive Shell
process.executable	/usr/bin/bash
kibana.alert.rule.type	query
process.name	bash

rule.name	Linux Suspicious Child Process Execution via Interactive Shell
process.executable	/usr/bin/bash
kibana.alert.rule.type	query
process.name	bash
rule.description	Detects when a process is executed via an interactive shell. C2 platforms will commonly spawn an interactive shell providing the threat actor with a remote shell on the system as if they were physically at the terminal allowing them to send and execute commands manually.

3)DETECTION 3 – CRON JOB CREATED

⚠ Cron Job Created or Modified [↗](#)
